

VENUE WRANGLER

The Next-Generation Operating System for Live Sports & Entertainment Venues

CONFIDENTIAL BRIEFING
White-Label & Strategic
Licensing
Date: August 2026

Venue Wrangler is an enterprise stadium operating system and spatial digital twin engineered for NFL/MLB/NBA arenas, convention centers, and major concessionaires (Aramark, Levy, Delaware North, Legends). Uniting **Ticketmaster-grade 3D venue mapping**, **real-time POS data aggregation**, **automated game-day operations command**, and **statutory union labor compliance (UNITE HERE / IATSE / SEIU)**, Venue Wrangler replaces fragmented legacy silos with a single high-margin intelligence platform.

\$52.5B TAM

GLOBAL VENUE & SPORTS TECH MARKET

Converging Stadium SaaS, POS rails, and labor compliance.

\$95K – \$385K

AVERAGE ANNUAL CONTRACT VALUE (ACV)

82%+ gross software margin per stadium property.

1. Ticketmaster-Style 3D Spatial Digital Twin

Venue Wrangler provides full 3D isometric bowl perspective and 2D floorplan visualization across all physical layers of a stadium:

- Level 0 Field & Sidelines:** Real-time service areas on Home and Visiting Sidelines, player hydration benches, and North/South Endzone mobile runner depots.
- Level 0 Athlete & Performer Compound:** Home/Visiting team locker rooms with nutrition kitchens, Halftime Headliner green room dressing suites, and league official rooms.
- Level 100 Concourse & VIP Bunkers:** 8 distributed high-velocity concession hubs and 2 luxury sub-field bunker vaults (Chef carving stations & bourbon cellars).
- Level 200 Club & 300 Luxury Suites:** Owners skyboxes, panoramic 50-yardline taprooms, and digital BEO pre-order tracking.

2. Master Operations Command Center

An automated game-day cockpit offering a composite **0–100% Venue Readiness Score**, active action blocker queues, run-of-show milestone timelines, vendor gate check-ins, and one-tap post-event financial closeout (attendance, POS sales, and labor percentages).

Figure 2: Master Operations Command Center with 98% Readiness Scoring and Action Blockers Queue

3. Universal POS Aggregator & Union Labor Compliance Engine

Universal POS Stream

Ingests real-time streams across **Toast, Clover, Square, Micros Symphony, Revel, Shift4, and Lightspeed**. Eliminates expensive hardware replacements while delivering unified revenue telemetry and stand-sheet reconciliation.

Automated CBA Rules Engine

Enforces **UNITE HERE, IATSE, and SEIU** collective bargaining rules: daily/weekly overtime, meal/rest break penalty automation, split-shift premiums, and geofenced badge verification to prevent union grievances.

4. Comparable Transactions & Market Multiples

Company / Deal	Acquirer / Valuer	Valuation / Deal Size	Valuation Multiple Benchmark
VenueNext	Shift4 (2021)	\$72 Million	~10x – 12x ARR (Stadium digital infrastructure)
Appetize	SpotOn (2021)	\$415 Million	~9x – 11x ARR (Sports & entertainment F&B)
SevenRooms	Strategic Growth	\$500M+ Valuation	~12x – 16x ARR (Guest hospitality & CRM)
Toast (NYSE: TOST)	Public Market	~\$15 Billion	~3.5x – 4.5x Gross Revenue / 8x Gross Profit

5. Valuation Methodology & Financial Projections

Scenario A: Strategic IP & Asset Replacement (Current Pre-Scale)

Asset Valuation: \$2.5M – \$5.0M

Based on replacement cost and intellectual property of the turnkey NestJS/Expo platform, 3D stadium twin engine, universal POS schema, and union compliance IP.

Scenario B: Vertical SaaS ARR Multiple Valuation (Commercial Rollout)

Deployment Tier	Annual ARR	Conservative (8x)	Base Case (11x)	Bull Case (14x)
10 Stadium Venues	\$1.20M	\$9.6 Million	\$13.2 Million	\$16.8 Million
25 Stadium Venues	\$3.00M	\$24.0 Million	\$33.0 Million	\$42.0 Million
50 Venues (Concessionaire)	\$6.50M	\$52.0 Million	\$71.5 Million	\$91.0 Million

Scenario C: Strategic M&A Exit

Target Exit Range: \$35M – \$85M+ upon scaling to \$3M–\$6M ARR, representing an acquisition target for **Shift4, Toast, Oracle Hospitality, Aramark, Levy, or Legends**.

6. Technology Stack & White-Label Readiness

Built for enterprise scale with **Expo Router, React Native for Web, NestJS API, PostgreSQL (Prisma), Supabase Auth, Redis, RabbitMQ, and Cloudflare Pages edge hosting**. Supports 100% white-label custom domain branding, multi-tenant isolation, and granular RBAC.
